INSTALLATION INSTRUCTIONS

Please Note :

Disconnect from power source to prevent electrical shock before installing or servicing unit.
 No liability is accepted for any consequence due to the incorrect use of this document.
 Technical specifications of the unit subject to change without prior notice caused by ongoing product engineering.
 All dimensions are approximate and subject to change.
 Servicing and / or replacements of parts by qualified electricians recommended.

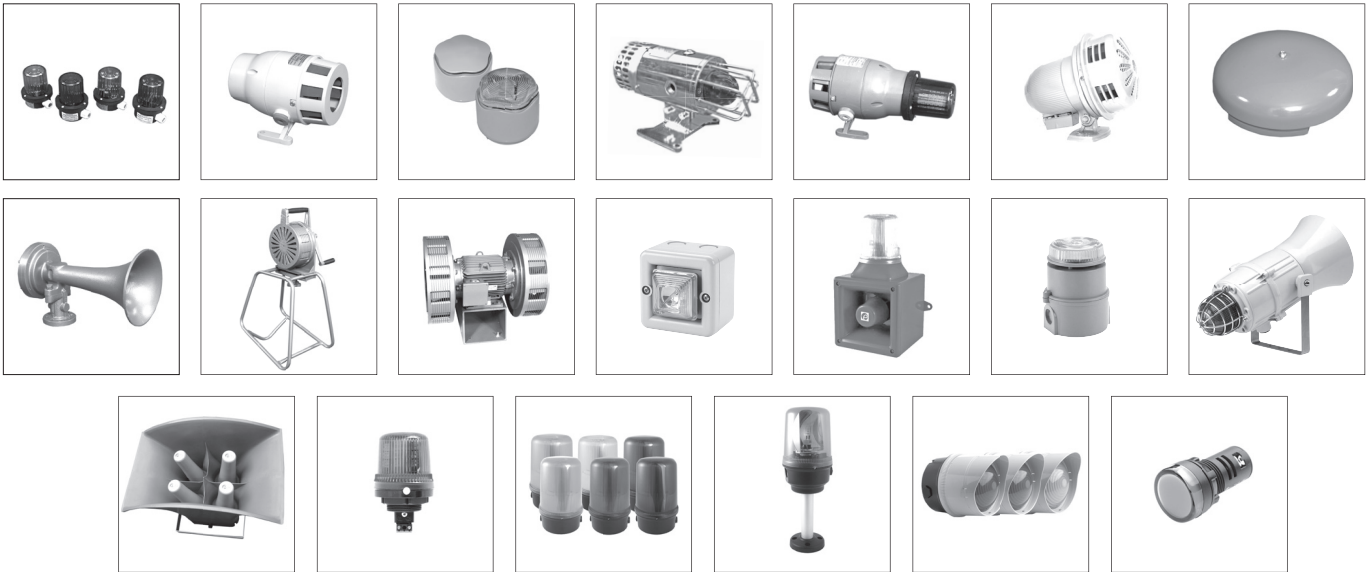

Fitment :

Please consult catalogue for correct siren choice for application.
 Unit ideally should be mounted in a horizontal position, in environments where particles or dirt can fall into the horn it is advisable to mount the horn facing downward.
 For fitment of unit remove back cover and mount in desired position using both 7mm Mounting holes situated on item foot.
 Lead connections as indicated above for specific model purchased.
 Replace back cover to close unit prior to power unit up.

FOR DIY UNIT, DO NOT OPEN. USE CABLES SUPPLIED

Manufactured in South Africa to the highest international standards. The best back up on all local manufactured and imported parts. International quality leading brands for over 20 years.
