

LIGHTspeed CLEAN WIPE TUB (90 cleans) MEGALSRL40

This Sticklers® tub of benchtop CleanWipes™ are high quality, lint-free wipes engineered for use on bare fiber before splicing, and for cleaning fiber optic jumpers. These wipes lift away fingerprint oils, grime, dust and lint. The wipes are made from soft hydroentangled polyester fabric which resists shredding when cleaning. They are exactly the right size and the right material to make “wet-dry” cleaning simple and cost-effective.

Features

- 90 optical grade lint-free wipes in mini-tub
- Made without glues, bleach or cellulose resulting in minimum residue
- To be used with the Sticklers® Fibre Optic Splice & Connector Cleaner for best results
- Makes “wet-dry” cleaning of fiber optic connectors easy
- Far stronger and less linting than cellulose wipes
- Superior results when cleaning bare fiber
- Very affordable on a cost-per-cleaning basis

Dimensions

- Tub
80 x 80 mm
- Wipe
50 x 100 mm

It is essential that each connector and every splice be cleaned during installation, maintenance and reconfiguration. This is applicable even if a jumper is new, right out of the bag. Most experts recommend cleaning with a wet – dry method for best results.
